EDUCATION

B.Sc. in Industrial Science 2015-06-01
YCMOU Open University • 76.94%

Diploma in Mechanical Engineering 2011-07-01
MSBTE, Mumbai • 54.08%

SKILLS

- Excel
- SQL
- Python
- Power BI
- Pandas
- Data Wrangling
- Streamlit
- Exploratory Data Analysis
- Reports
- Generative AI

SUMMARY

Aspiring Data Analyst with a strong foundation in business development and operations, seeking to leverage analytical skills and expertise in data visualization tools to extract actionable insights and drive data-informed decision-making.

EXPERIENCE

BDE
02/22 – 11/23
Wallace Pharmaceuticals Pvt. Ltd. Navi Mumbai

● Collected and analyzed sales data to identify growth opportunities.
● Prepared performance reports for management.
● Used Excel dashboards to track targets vs achievements.

BDE
08/21 – 02/22
El-dorado Bio-Tech Pvt. Ltd. Navi Mumbai

● Collected and analyzed sales data to identify growth opportunities; prepared performance reports for management.
● Used Excel dashboards to track targets vs achievements.

As a Store Incharge
06/17 – 01/20
J.K. Enterprises, Hingna MIDC, Nagpur

● Managed inventory records and optimized stock levels.
● Generated daily/weekly reports for operational efficiency.

As a Technical Trainee
11/11 – 11/14
Mahindra & Mahindra Ltd. Hingna MIDC, Nagpur

● Assisted in production data tracking and reporting.
● Supported process improvement initiatives with data insights.

PROJECTS

Factory Reallocation & Shipping Optimization System – Nassau Candy Distributor

● Built a decision intelligence platform to predict lead times, optimize factory-product assignments, and recommend cost-efficient reallocations.
● Applied Python (Pandas, NumPy) for data processing, ML models (XGBoost, LightGBM, CatBoost) for lead time and cost prediction, and SHAP for model explainability.
● Implemented MILP optimization using PuLP to generate reallocation strategies and integrated scenario simulation dashboards in Power BI and Streamlit.
● Achieved reduced delivery lead times, lowered transportation costs, improved factory utilization, and provided actionable recommendations that enhanced profitability and supply chain efficiency.

Release Care Transition Efficiency & Placement Outcome Analytics · Sampulers/HHS-Care-Transition-Efficiency-Placement-Outcome-Analytics

Care Transition Efficiency & Placement Outcome Analytics

● Designed an analytics framework for the HHS UAC program to measure care transition efficiency, identify bottlenecks, and forecast demand.
● Implemented Python (Pandas, Plotly) for data processing, Holt-Winters forecasting for demand prediction, and dashboards in Streamlit & Power BI.
● Developed KPIs (transfer efficiency, discharge effectiveness, backlog rate) with predictive alerts and interactive visualizations.
● Delivered real-time monitoring and executive dashboards that reduced delays, improved resource allocation, and strengthened reunification outcomes.
